MABAS 19

Supplemental Dispatching Procedure For Task Force 19 Responses

TASK FORCES

For the purpose of MABAS responses, a task force is defined as predetermined response to another MABAS division that has already used its available resources. A task force responds as a unit and is able to communicate on a common radio frequency.

MABAS Division 19 has prepared Task Force responses for fires, EMS and Disasters. When another Division requests a task force response, the MABAS dispatcher shall alert all Division 19 departments and advise them of the request. The following locations are defined as rallying areas in which the Task Force will assemble to respond to the stricken division.

Companies will respond to mustering no lights or sirens. The Chief of Task Force 19 will determine the response mode from mustering point to destination.

NORTH

Assigned companies will meet at Jewel Parking lot located at 131st Street and LaGrange Road. From this point the assigned Chief will use the radio designation of Task Force 19 to communicate with the stricken division and will determine the best route of travel.

EAST Assigned companies will meet at the Tinley Park Convention Center Parking Lot at the S/E corner of 183rd Street and Harlem Av. From this point the assigned Chief will use the radio designation of Task Force 19 to communicate with the stricken division and will determine the best route of travel.

SOUTH

Assigned companies will meet at I-57 and Peotone Road. From this point the assigned Chief will use the radio designation of Task Force 19 to communicate with the stricken division and will determine the best route of travel.

WEST

Assigned companies will meet at East Joliet Station #3. From this point the assigned Chief will use the radio designation of Task Force 19 to communicate with the stricken division and will determine the best route of travel.

The assigned Chief will communicate with MABAS 19 dispatchers to advise them of when the Task Force has assembled and is proceeding to their assignment. The Task Force Chief should also give MABAS 19 regular updates during the duration of the incident.
